PRESENT POSITION

“G. d’Annunzio” University of Chieti-Pescara – Chieti – Italy
Dept. Neuroscience, Imaging and Clinical Sciences
Senior Researcher (art. 24 comma 3-b L. 240/10), SSD FIS/07.

ACADEMIC DEGREES

2013 - dic	National Scientific Qualification as Associate Professor of Applied Physics
2009 - apr.	“G. d’Annunzio” University of Chieti-Pescara – Chieti Dept. Clinical Sciences and Bioimaging PhD in “Functional Neuroimaging: from cells to systems.” Dissertation title: “METHODS FOR THE ESTIMATION OF FREQUENCY SPECIFIC FUNCTIONAL CONNECTIVITY IN THE BRAIN FROM EEG/MEG DATA”
2000 – mar.	University of Ancona - Ancona Master degree in Electronic Engineering with specialization in Biomedical Engineering

RESEARCH POSITIONS

17/06/2015- present	“G. d’Annunzio” University of Chieti-Pescara – Chieti – Italy Dept. Neuroscience, Imaging and Clinical Sciences Senior Researcher (art. 24 comma 3-b L. 240/10), SSD FIS/07.
01/01/2011- 16/06/2015	“G. d’Annunzio” University of Chieti-Pescara – Chieti – Italy Dept. Neuroscience, Imaging and Clinical Sciences Junior Researcher (art.1 comma 14 L. 230/05), SSD FIS/07. Research program title “METHODS FOR THE ESTIMATION OF RESTING STATE FUNCTIONAL CONNECTIVITY WITH MEG” - HUMAN CONNECTOME PROJECT (1U54MH091657-01), NATIONAL INSTITUTES OF HEALTH, USA
01/11/2007- 31/12/2010	“G. d’Annunzio” University of Chieti-Pescara – Chieti – Italy Dept. Clinical Sciences and Bioimaging PostDoc, SSD FIS/07. Research program title “DEVELOPMENT OF METHODS FOR MULTIMODAL INTEGRATION OF MEG AND FMRI” <i>Obligatory maternity work break from 02/09/2008 until 02/02/2009</i>
2007 june - september	Fraunhofer FIRST Institute – Berlin – Germany visiting student at IDA - Intelligent Data Analysis group (Prof. K.R. Mueller).
01/11/2004 - 31/10/2007	“G. d’Annunzio” University of Chieti-Pescara – Chieti – Italy Dept. Clinical Sciences and Bioimaging PhD training in “Functional Neuroimaging: from cells to systems.”
16/09/2002 - 31/07/2004	Universitaet Ulm, Ulm, Germania Zentralinstitut fuer Biomedizinische Technik, Arbeitsbereich Biosignal- und Bildgebungstechnologie, ZIBMT Research Associate, BAT IIa
08/03/2001 - 15/09/2002	Advanced Technologies Biomagnetics srl - Pescara Software development for biomedical data analysis

SCIENTIFIC ACTIVITY

Since 2002 my research is focused on physics applied to medicine , with particular reference to the development of methods and models for the study of the electromagnetic field related to brain activity as measured by non- invasive electrophysiological techniques such as Magnetoencephalography (MEG) and electroencephalography (EEG) .

In 2002-2004 , as a Research Associate at the University of Ulm (Germany), I have investigated methods for removing artifacts from brain signals and for the solution of direct and inverse electromagnetic problem. This work was awarded the prize " S. J. Williamson Award " by the International Conference on Biomagnetism - BIOMAG2004.

From 2005 to 2007, during the PhD in Functional Neuroimaging at the University "G. D'Annunzio "of Chieti - Pescara, my research interests have expanded to the study of "functional brain connectivity". In particular, I have developed methods, robust to the effects of volume conduction, based on the properties in the frequency domain of the MEG/EEG signal. For the implementation of these methods in EEG data, I also conducted a study to assess the effect of the choice of the reference electrode in the EEG functional connectivity estimated from sensor level information. In the same context, in cooperation with the Fraunhofer Institute in Berlin First, I have designed and implemented a method to isolate the contribution of functional systems consisting of pairs of sources related brain at a specific frequency and to estimate their position. Winning a Travel Award (Human Brain Mapping 2005, Toronto) and a Student Paper Competition (NFSI 2007 Hangzhou, China) supported the participation in congresses.

From November 2007 to December 2010, as PostDoc at the University "G. D'Annunzio "of Chieti - Pescara, I studied the functional connectivity in the brain at rest investigating the electrophysiological correlates of so-called Resting State Networks identified on the basis hemodynamics. In this context, the difficulty lies mainly in low signal to noise ratio of MEG/EEG signals generated by the brain at rest. To characterize the modulations in time and / or in the frequency domain of the behavior of such networks, I developed analysis methods inherently robust to noise to allow, in the first place, to achieve adequate separation between the signal subspace and noise subspace and, subsequently, to assess the functional connectivity between the generators with a class of dedicated methods. The comparison of the results provided by MEG and EEG and fMRI approaches to functional connectivity, both in the execution of tasks in the brain at rest, has also established an important stage of study during this period. This research formed part of the European project Brainsynch FP7 HEALTH-2007-200728.

From January 2011 to date, I have continued the research activities focusing on the development of methods for studying phase relationships between brain areas. The particular relevance of this class of methods is linked to the fact that it allows to investigate the functional interactions in the brain from a perspective close to the mechanisms of neuronal communication based on phase synchronization and highlight its relations with the power modulations as observed by fMRI. The work was supported in part with funding from Human Connectome Project (1U54MH091657-01) - NIH - USA, aiming to characterize the map of the anatomical and functional interactions in the brain. Moreover, during these years, my research has ranged from the study of the plasticity of the brain networks induced by meditation practices, to alterations in brain function after stroke or brain stimulation current, to the role of brain rhythms in social interaction tasks.

TEACHING ACTIVITY

Since the 2005/06 academic year to date, Laura Marzetti teaches at the University " G. d' Annunzio" University of Chieti - Pescara within the scientific sector FIS/07 in the application of methodologies physical in the biomedical field in undergraduate courses and Master's courses. The detailed schematic of the complete teaching activity is provided below:

TEACHING ACTIVITY IN UNDERGRADUATE AND MASTER DEGREE COURSES

TEACHING ACTIVITY IN PHD COURSES

- Member of the PhD faculty collegiums in Neuroscience and Imaging, University of Chieti and Pescara " G . D' Annunzio " - Chieti , Department of Neuroscience and Imaging for the XXVIII cycle

- PhD program in "Functional Neuroimaging: from cells to systems" – "Programming in Matlab, basic course" for the XXIV cycle , University of Chieti and Pescara " G . D' Annunzio " - Chieti , Department of Clinical Sciences and Bioimaging
- PhD program in "Functional neuroimaging to molecular biology to cognitive sciences"- "Programming in Matlab, basic course" for the XXV, XXVI , XXVII, XXVIII cycles, University of Chieti and Pescara " G . D' Annunzio " - Chieti , Department of Neuroscience and Imaging
- PhD program in " Neuroscience and Imaging" - "Programming in Matlab, basic course" for the XXIX , XXX cycle , University of Chieti and Pescara " G . D' Annunzio " - Chieti, Department of Neuroscience and Imaging

• **Student supervisor in the PhD program "Neuroscience and Imaging"**, bound theme "Tools and methods of neuroimaging in the study of brain connectivity", Department of Neuroscience, Imaging and Clinical Sciences, University G. d' Annunzio: Dott.ssa Antea D'Andrea, XXIX cycle

• **Research fellow supervisor** in "Methods for the study of functional connectivity in aging" Department of Neuroscience, Imaging and Clinical Sciences, University G. d' Annunzio: Dott. Federico Chella

PRIZES AND ACKNOWLEDGEMENTS

2013 - june	Conference: “Human Brain Mapping (HBM)” – 16-20 June 2013 – Seattle (USA) “Travel Award “for the scientific work “ <i>Frequency Specific Interactions of MEG activity within and across resting state networks as revealed by MIM</i> ”
2007 – oct.	Conference: “Joint Meeting of the 6th International Symposium on Noninvasive Functional Source Imaging of the Brain and Heart and The 9th International Conference on Functional Biomedical Imaging” – Oct. 13, 2007 – Hangzhou – China, “Student Paper Competition”
2005 - june	Conference: “Human Brain Mapping (HBM)” – 12-16 June 2005 – Toronto (Canada) “Travel Award “ for the scientific work “ <i>Performances of Boundary Element Method and Lead Field Method in the Inverse Problem Solution</i> ”
2004 - aug.	Conference: “14th International Conference on Biomagnetism (BIOMAG)” - 8-12 August 2004 “Samuel Williamson Award” for the scientific work “ <i>Comparison of Boundary Element Method and Lead Field Method Performance in the Solution of the Inverse Problem</i> ”.

ORAL PRESENTATIONS AND INVITED TALKS

2015 – June	Human Brain Mapping (HBM) – June 14-18, 2015 - Honolulu, Hawaii (USA) Organizer and chairman of the Workshop "Time is of the essence: the role of EEG and MEG in mapping the human brain"
2013 - June	Disentangling the brain web: a perspective from MEG" Simposio CiMeC Rovereto 25 e 26 giugno 2013 – Invited talk

June	Human Brain Mapping (HBM) – 16-20 giugno 2013 – Seattle (USA) Oral Presentation
2012 – March	SBAI Univ. Sapienza Roma, "Multivariate Interaction Measure" - Invited talk
2011 - June	Donders Institute for Brain, cognition and Behaviour - Radboud University Nijmegen - The Netherlands - Invited talk
2010 – March	Meeting "BrainSync" European Project (HEALTH FP7) „BrainSync“ „Large Scale Interaction in Brain Networks and their Breakdown in Diseases Brain“ - Praga - Oral Presentation
2009 – July	Conference on Applied Inverse Problems 2009 –Lug. 20-24, 2009 - Vienna (Austria) - Oral Presentation
2009 – May	7th NFSI and ICBEM - Mag. 29-31, 2009 – Roma (Italia) - Oral Presentation
2007 - Oct.	“Joint Meeting of the 6th International Symposium on Noninvasive Functional Source Imaging of the Brain and Heart and The International Conference on Functional Biomedical Imaging”–Oct. 13, 2007 – Hangzhou (China) - Oral Presentation
2006 - Sept.	“17th Conference of the International Society for BioElectro Tomography (ISBET)” - 27-30 settembre 2006 - Chieti (Italia) - Oral Presentation
2003- Sept.	“Gemeinsamen Jahrestagung der Deutschen, der Oesterreichischen und der Schweizerischen Gesellschaften fuer Biomedizinische Technik” - 25-27 settembre 2003 – Salisburgo (Austria) - Oral Presentation
